

Horse foot – deep palmar dissection

Ref.no.: VP10040

Horse foot - deep palmar dissection

This dissected left-foot specimen displays the plantar digital neurovascular bundle both sides of the flexor tendons. The two digital extensor tendons are identified in the dorsal aspect of the specimen. The plantar aspect of the metacarpophalangeal and proximal interphalangeal joints show a dissection of the deep ligaments and their relationship with the neurovascular bundle.
